

EXPERIENCE THE VALUE OF QUALITY

Software Quality as a Foundation for Security

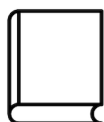

MEETING
DESTINATION
VIENNA
NOW ♦ TOGETHER

Useful Information

Free WLAN!

Feel free to use the venue's WLAN free of charge.

Scientific Conference Book

The new scientific conference book by Springer-Verlag constitutes the refereed proceedings of the scientific papers. You can buy it online on the Springer website www.springer.com

Networking Area

During the conference days you will find representatives of all exhibitors providing you with the latest trends and solutions. All food and beverages will be served in this area, as well.

Hotline

For urgent concerns please reach out to the conference team at the registration point or give us a call: +43 676 66 73 816

Business Speed-Dating

Are you tired of endlessly swiping left and right, hoping to find the perfect match?

Why not try a different approach?

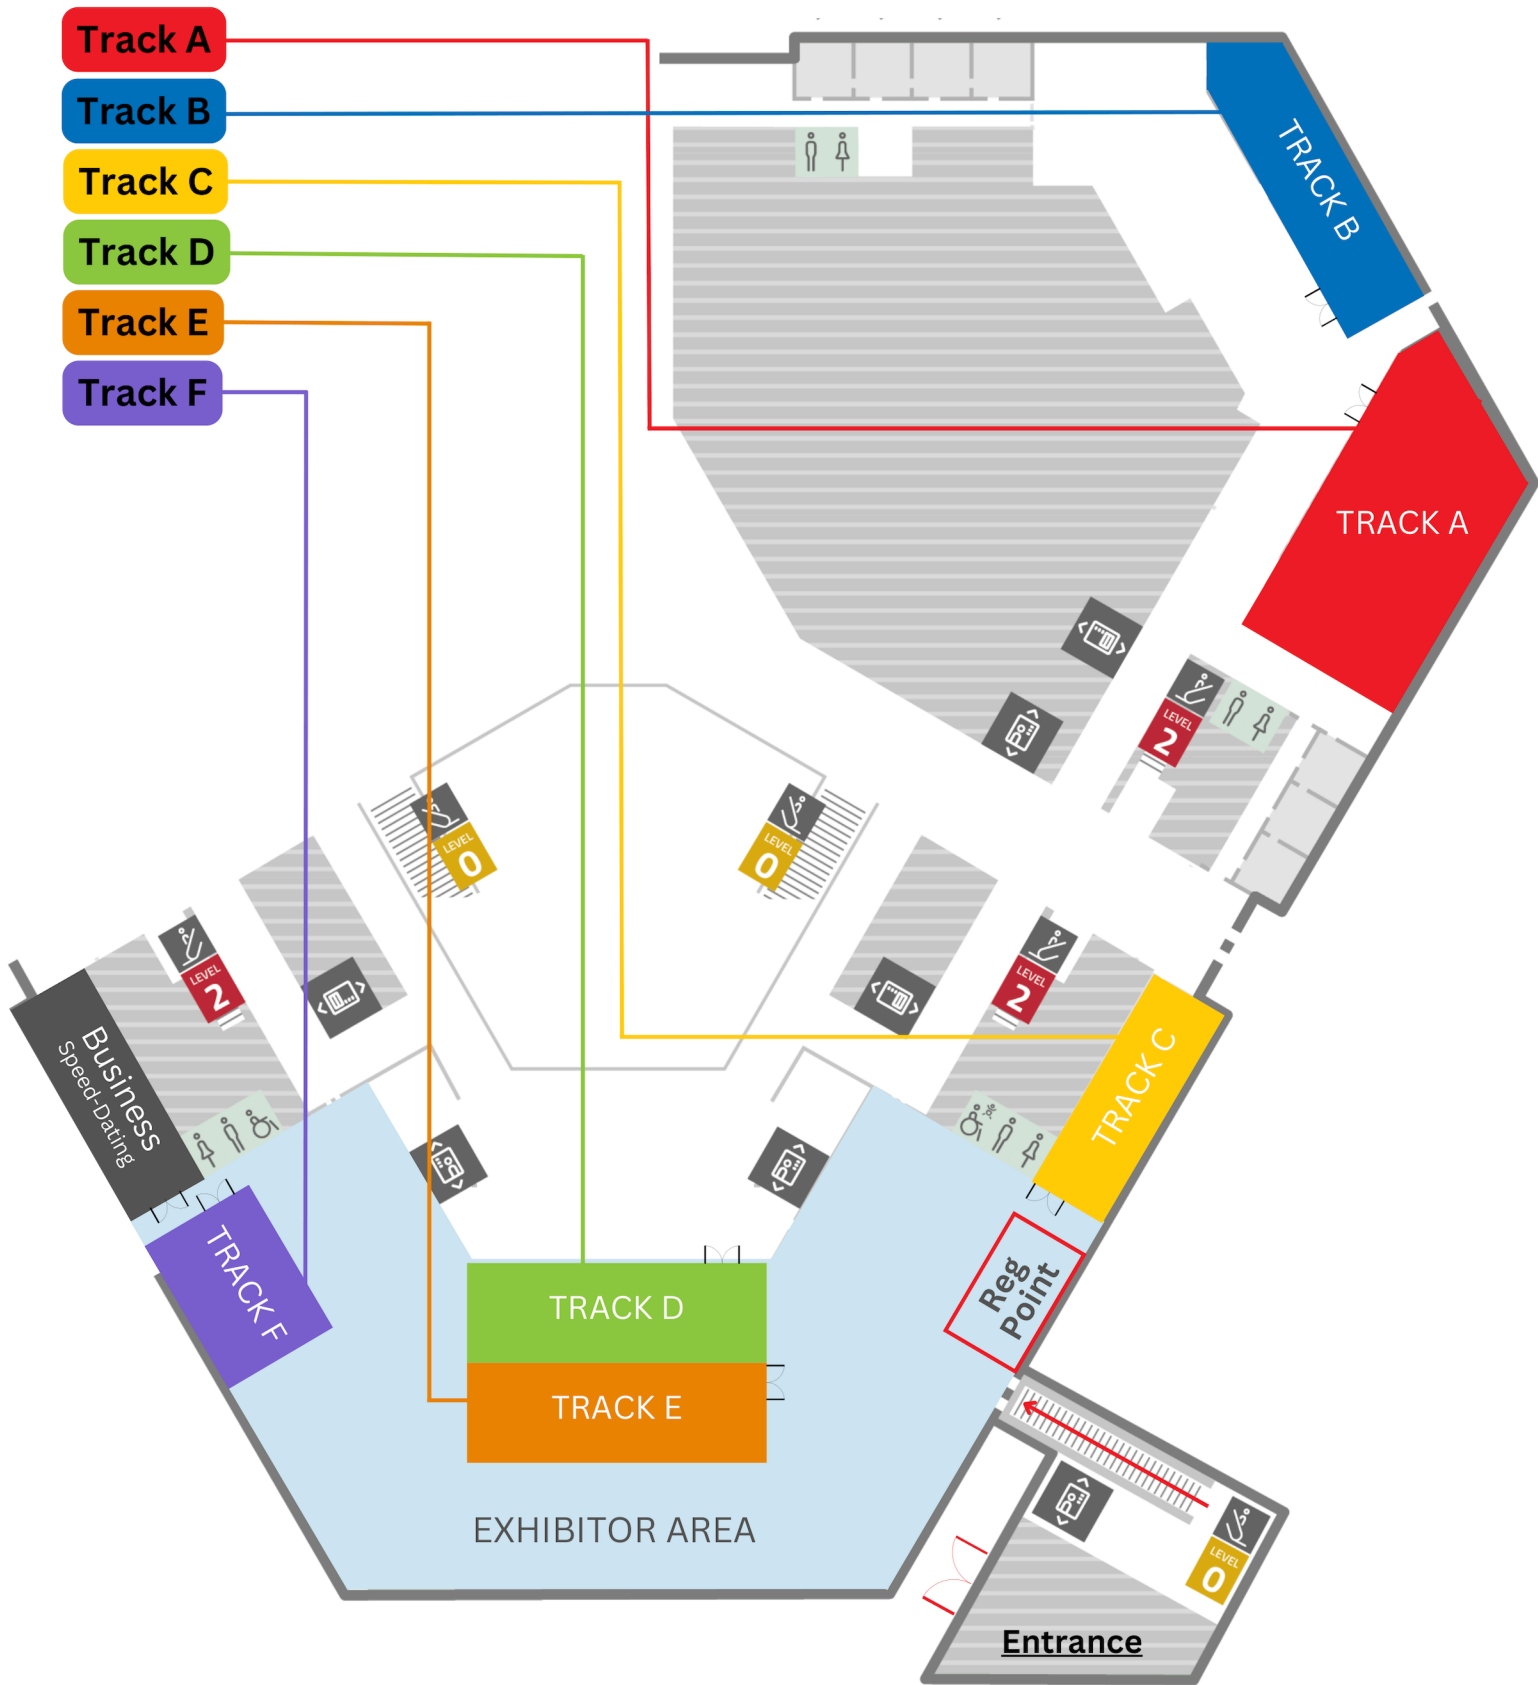

Join us for our Business Speed-Dating event, where you can connect with like-minded professionals and potential business partners in a fun and efficient way. You'll have the opportunity to meet multiple people in a short amount of time, and who knows?

You might just find the perfect match for your business needs. Don't miss out on this exciting opportunity to network and expand your horizons!

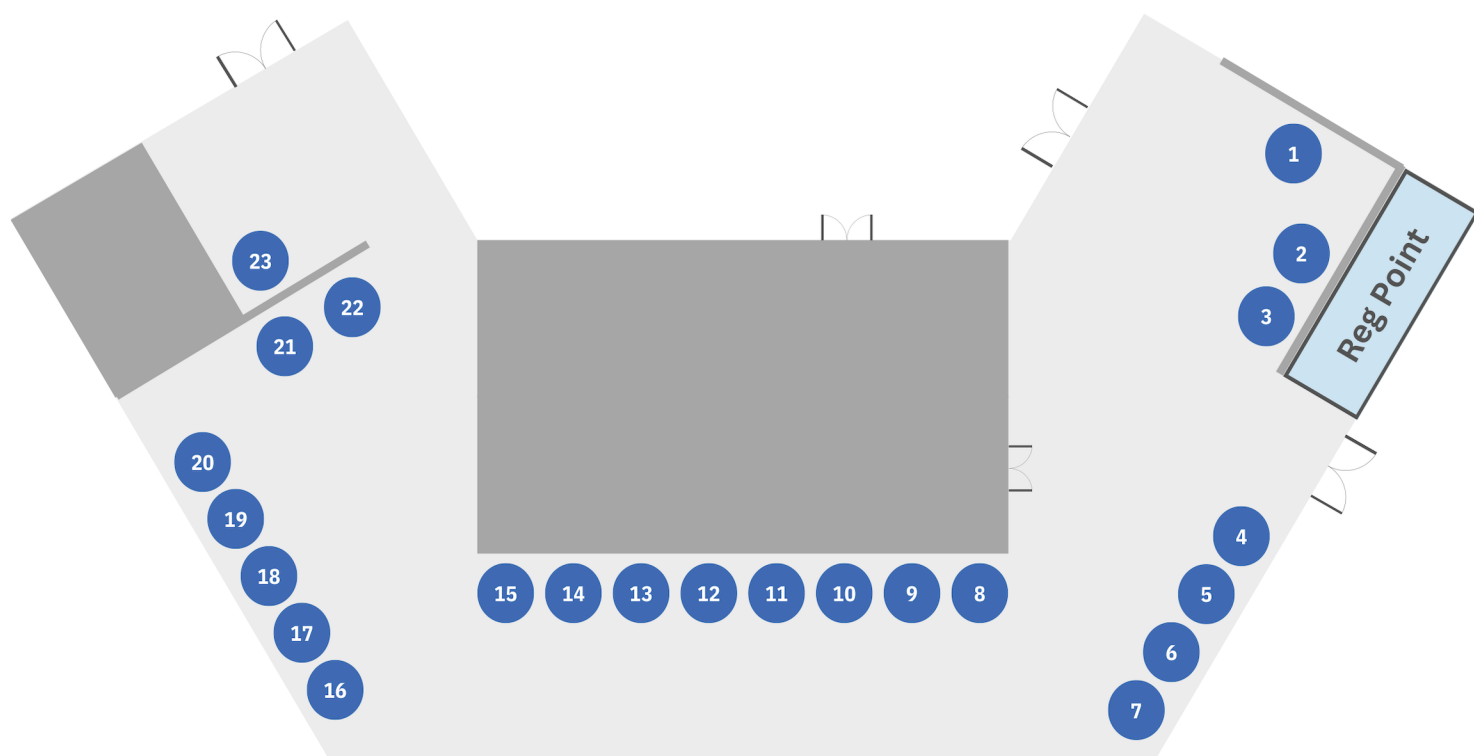

April 25th, 2024 | 1.00 pm

If you want to participate, please sign up at the Registration Point until 11.15 am on April 25th, 2024.

Methodological QA Expertise for Software Engineers

OUR PORTFOLIO

We are leading in up- and re-skilling of software specialists along the software lifecycle. We offer our accredited courses in different educational formats with or without certification exam.

REQUIREMENTS

ARCHITECTURE

TESTING

Get your education and certificate now with the market leader in the Austrian QA education industry with over 2,000 trainees from over 580 business customers annually.

Consulting

Knowledge. Experience. Best Practices.

OUR PORTFOLIO

High quality products, efficiency in all processes and customers' excitement are goals of modern software engineers. Hence, organisations, processes, people, methods and tools have to be perfectly aligned. We help you to achieve these goals sustainably within your organisation.

- Management Consulting and Coaching
- Processes, Procedures and Metrics
- Agile Procedure Models
- Requirements Specification
- Tenders and Supplier Audits
- User Experience and Visual Design
- Architecture and Modelling
- Code Analysis and Code Software Quality
- Testing Strategy and Testing Processes
- Test Automation Concepts

Keynotes

Joshua Kerievsky
April 24th, 2024
09.15 - 10.15

Joy of Agility

Agile is an adjective. It describes a timeless way of being that matures with practice and skill. If you've thought of Agile as a formula, a framework, or a set of roles and rituals to follow, I believe you will benefit from a broader understanding of agility.

Becoming agile involves knowing the difference between being quick or hurrying, moving with ease or difficulty, being in or out of balance, graceful or awkward, adaptable or rigid, resourceful or resentful.

In this talk, based on my book, Joy of Agility, I will share six essential agile mantras, plus unforgettable, real-world agile stories that will empower you to be quick, adaptable, and resourceful in the face of opportunities and challenges.

How are We Doing with Adopting Tasks to Reduce Software Supply Chain Security Risk?

Software supply chain attacks have surged by 700% annually in the last three years, catching the industry off guard. The attack landscape has shifted from passive exploitation to active implantation of vulnerabilities in dependencies and infiltrating builds (e.g., SolarWinds). Section 4 of the May 2021 US Executive Order on Cybersecurity and similar initiatives worldwide emphasize the need for security measures. Noteworthy documents, like NIST SSDF, SLSA, OpenSSF S2C2F, and Cloud Native Computing Foundation's Best Practices, outline strategies.

This talk introduces the Proactive-Secure Software Supply Chain Risk Management (P-SSCRM) model, consolidating 72 tasks across categories. Empirical results on task adoption by industrial organizations will be presented based on practitioner interviews.

Future Now – Zukunft ist jetzt!

Die europaweit einzige Keynote Show, die das Thema Digitalisierung, Zukunftstrends und Innovationen top recherchiert und gleichzeitig höchst humorvoll präsentiert.

Die Trend- und Zukunftsshow „Future now“

- ist die einzige Keynote-Show zum Thema Digitalisierung, die das Thema humorvoll vermittelt.
- ist ein top-aktueller, bestens recherchierter Vortrag zum Thema Zukunft und Innovationen.
- über 150.000 € Recherche- und Entwicklungskosten sind in diesen Vortrag eingeflossen.
- ist das unvergessliche Highlight für jedes Digitalisierungs-Event.
- informiert Ihre Gäste auf unterhaltsame und spannende Weise.
- und zeigt diesen, dass sie den Herausforderungen der Zukunft am besten mit einem Lächeln begegnen.

April 24th, 2024 - Conference Day 1

	Track A	Track B	Track C
08.00 - 09.00	Registration		
09.00 - 09.15	Track A: Opening Session		
09.15 - 10.15	Keynote, Track A: Joy of Agility Joshua Kerievsky EN >		
10.15 - 10.25	Track A: Conference Info & Scientific Lectures Info		
10.25 - 10.40	Track A: Speed presentations by the Exhibitors		
10.40 - 11.10	Coffee break & networking in the exhibition area		
Topics	Security	Architecture Coding	Testing Test Data
11.10 - 11.55	Expedition CRA - Der steile Weg zur Security Christoph Ranalter DE >	Go big or go home - The beauty of the Monolith Philipp Seifert-Kehrer EN >>	Eine Herausforderung für Tester und Entwickler - wo finde ich Daten für meine Tests? Danny Tamm DE >
12.00 - 12.45	AppScan 360° - Security Testing: Deployable Anywhere Udo Blank DE >	Memory Safety in Rust: A Paradigm Shift in Systems Programming Rainer Stropek EN >>	Das Ende von Testdaten auf Vorrat Björn Scherer DE >>
12.45 - 14.15	Lunch break & networking in the exhibition area		
Topics	Compliance Security	Architecture Coding	Testing AI
14.15 - 15.00	Challenges of Assuring Compliance of Information Systems in Finance Tomas Bueno Momcilovic EN >>	Collaborative modeling with shared domain-specific languages: experiences from different industries Juha-Pekka Tolvanen EN >>	Die Zukunft des Softwaretestens: Generative KI als Game-Changer Thomas Steirer, Thomas Schweiger DE >>
15.05 - 15.50	A PUF-Based Approach for Copy Protection of Intellectual Property in Neural Network Models Hannes Sochor EN >>>	From the Dream of a long-lasting Software Architecture Christian Dangl EN >>	DataMaker: Empowering Your Testing Efforts with AI-Driven Data Generation Amin Chirazi, Valentin Ober EN >>
15.50 - 16.20	Coffee break & networking in the exhibition area		
Topics	Security	Architecture Coding	Testing AI
16.20 - 17.05	Automatisierte Sicherheitsüberprüfungen im Entwicklungsprozess Christian Biehler DE >>>	Communicate efficiently with Software Architecture Diagrams Simon Lasselsberger EN >>	Barrierefreiheitstesten von Webanwendungen unterstützt durch KI Valentin Dallmeier DE >
17.10 - 18.00	OWASP API Security Top10 - Wie man Web-Schnittstellen mit kostenfreien Werkzeugen selbst auf Schwachstellen testet Frank Ullly DE >>	Architecture Patterns for Event-Driven Cloud Systems Raphael Dumhart EN >>>	Transparenz für die gesamte Testpyramide - Erfahrungen bei der Allianz Technology GmbH Fabian Streitl, Nadezhda Tonchev, Albert Bischof DE >

08.00 - 09.00	Registration		
09.00 - 09.15	Track A: Opening Session		
09.15 - 10.15	Keynote, Track A: Joy of Agility Joshua Kerievsky EN		
10.15 - 10.25	Track A> Conference Info & Scientific Track Info		
10.25 - 10.40	Track A: Speed presentations by the business package sponsors		
10.40 - 11.10	Coffee break & networking in the exhibition area		
Topics	CI CD	Communication Collaboration	Metrics
11.10 - 11.55	CI/CD: Tests und Reports aus einem Guss für alle Stakeholder Hermann Bayala DE >	Kollaborative Techniken im Threat-Modelling: Mit Domain Storytelling und Gamification zur sicheren Anwendung Carsten Lill, Markus Geiger DE >	Messen von Qualität und Produktivität in der Softwareentwicklung: Das geht nicht! - Oder? Maik Wojcieszak DE >
12.00 - 12.45	Continuous Everything - Is the juice worth the squeeze? Marco Achtziger EN >>	Kollaboration: Die Mechanik des Vertrauens Danilo Assmann DE >>>	Überlebenstraining Metriken Klaus Marquardt DE >>
12.45 - 14.15	Lunch break, networking in the exhibition area		
Topics	Software Quality	Communication Collaboration	Code Quality Accessibility
14.15 - 15.00	Observe your GitHub repos efficiently Syed Usman Ahmad EN >	On the interaction between Software Engineers and Data Scientists when building Machine Learning-Enabled Systems Marcos Kalinowski EN >>	Source Code Clone Detection Using Unsupervised Similarity Measures Jorge Martinez-Gil EN >>>
15.05 - 15.50	Leveraging Infrastructure as Code for Enhanced Testing, Automation, and Security Chris van Bael EN >	Towards integrating knowledge graphs into process-oriented human-AI collaboration in industry Agastya Silvina EN >>>	Accessibility Unlocked - Qualitätssicherung von Barrierefreiheit im Netz Manuel Koller DE >>
15.50 - 16.20	Coffee break & networking in the exhibition area		
Topics	Software Quality	CI CD	Test Data
16.20 - 17.05	Was tun mit "Überraschungseiern"? - Übernahme von Software mit unbekannter Qualität Peter Hollos, Sonja Trimmel DE >>	QA in TYPO3 - CI in a community-driven open-source project Markus Klein EN >>	Modellbasierte Testdatenerzeugung mit SMT-Solvern - der A12 Testdatengenerator Johannes Bauer DE >>
17.10 - 18.00	Agile, Lean und DevOps vereinen und optimieren mit Value Stream Management Udo Blank DE >	Using Datalog for Effective Continuous Integration Policy Evaluation Bruno Rucy Carneiro Alves de Lima EN >>>	Daten und Datenprozesse testen - so einfach und so gut wie nie! Hermann Friebe, Joshua Claßen DE >>

AUTOMATORS

AUTOMATORS GmbH
automators.com

Automators is a leading consultancy in automated, continuous testing of critical systems and processes. We make developing, maintaining and monitoring business applications exceptionally fast and reliable. From coaching and ongoing quality engineering to continuous integration, we bring unprecedented speed and intelligence to test automation.

CQSE GmbH
cqse.eu

Successful companies must constantly adapt their software systems: Only those who implement new requirements quickly and cost-effectively remain competitive. Since changes made under high pressure lead to a creeping decline in the quality of the software, unnecessarily high maintenance costs are incurred and, in extreme cases, lead to a standstill in further development.

CQSE GmbH develops the Software Intelligence platform Teamscale. Teamscale accompanies software development and offers the possibility to continuously make the quality of a system visible. It combines the requirements of project managers, developers, testers and quality engineers and enables long-term and successful quality controlling.

In addition to tooling, CQSE's portfolio includes services for assessing the quality of software systems and ensuring their long-term maintainability: from auditing different quality characteristics to introducing continuous quality-control processes in development and testing.

Expleo Group Austria GmbH
expleo.com

Expleo is a global engineering, technology and consulting service provider that partners with leading organisations to guide them through their business transformation. We benefit from more than 50 years of experience developing complex products, optimising manufacturing processes, and ensuring the quality of information systems. Leveraging our deep sector knowledge and wide-ranging expertise in fields including AI engineering, digitalisation, hyperautomation, cybersecurity and data science, the group's mission is to fast-track innovation through each step of the value chain.

Additionally, Expleo boasts a track record of successfully guiding over 40 implementations of SAP S/4HANA. Built over three decades, our structured frameworks and best practice tools ensure a solution that works – streamlining the entire process and saving you money. We

provide an independent partnership-driven approach that covers all aspects of quality. We'll manage the programme and test throughout the full software delivery lifecycle – allowing for course corrections where necessary. From the development upfront, through unit and system integration testing, to end-to-end or functional acceptance testing. And all the way to user acceptance testing, ensuring successful deployment to your production environment. For more information, visit [Expleo.com](https://www.expleo.com)

HCLSoftware

HCL Technologies Germany GmbH
hcl-software.com

HCLSoftware's cloud strategy is finely crafted across four pillars, emphasizing agility, innovation, and comprehensive digital transformation. The Hybrid Data Cloud aims to seamlessly integrate data across platforms, enhancing IoT and decision-making capabilities. The Intelligent Automation Cloud leverages HCL's DRYiCE portfolio, alongside tools like BigFix and Workload Automation, to fuel IT operations with scalable, automated solutions. The Business Cloud accelerates time-to-market with robust integrations and platforms, fostering growth and efficiency.

Central to app development, the Create Cloud (App Dev Cloud) revolutionizes software creation with a blend of low-code, pro-code, and no-code options, enriched by AI, chatbots, and generative workflows, facilitating swift, versatile application development. Complementing this, HCLSoftware places a strong emphasis on Software Quality, integrating advanced testing and monitoring tools to ensure reliability, performance, and security across its product suite. This comprehensive approach not only streamlines development but also guarantees that quality is embedded throughout the lifecycle, underpinning HCLSoftware's commitment to delivering excellence in the cloud era.

Software Quality Lab Academy GmbH
software-quality-academy.com

For over 20 years, Software Quality Lab Academy has been supporting customers with method trainings for higher software quality along the software development lifecycle.

Being an accredited training provider for the international certification frameworks of IREB®, iSAQB®, and ISTQB®, our educational portfolio focusses on Requirements Engineering, Software Architecture, Software Testing and Agile Methods. As improving quality is the essence of what we do as a service provider, we hold ourselves accountable by being regularly audited and certified by TÜV Austria and Ö-Cert.

Software Quality Lab GmbH
software-quality-lab.com

Software Quality Lab enhances efficiency and quality in system and software development! We are a leading full-service provider to all questions and issues related to software quality and efficiency throughout the Application Development Life Cycle.

For over 20 years professional competence, extensive practical experience and solution-oriented work is highly valued by our customers. It is our job to ensure that your software is developed or introduced faster and better so that your customers are more satisfied while saving costs and time.

Focus on quality and contact us at the booth!

SQACE by FINARIS Financial Software GmbH
sqace.io

SQACE, ein innovativer Geschäftsbereich der FINARIS Financial Software GmbH, setzt neue Maßstäbe für das Testen von Daten und Datenprozessen.

Dieser Geschäftsbereich nutzt die umfassende Expertise von FINARIS im Bereich des Backend-Testings kritischer Finanzanwendungen, die durch komplexe Business-Logik und große Datenmengen gekennzeichnet sind.

Die Vision, die Qualitätssicherung von Daten so einfach und effektiv wie möglich zu gestalten, wurde mit dem gleichnamigen Produkt SQACE mit innovativen Konzepten verwirklicht.

Durch fortschrittliche Technologie mit intuitiver Bedienung, Visualisierung, Automatisierung und Förderung von Kollaboration gelingt es SQACE die Brücke zwischen IT und Business zu schlagen.

TestBench by imbus AG
testbench.com

imbus provides the quality and functionality that software-based products need for our digital future! We ensure that software performs reliably while being easy and barrier-free to use. We are a supportive and experienced partner for our customers throughout their entire development process. We are committed to helping our customers identify and eliminate any weaknesses before they become issues. We deliver quality. With passion and competence. To let smoothly running software make our world a little better and safer every day. TestBench offers an advanced software solution to plan, design, manage, execute and analyse product tests more efficiently. The tool was designed specifically for software development teams and their test managers, testers, developers, product owners and stakeholders.

Testfabrik Consulting + Solutions AG
testfabrik.com

At Testfabrik AG, we develop webmate, a robust software testing platform that offers a reliable cloud infrastructure with virtual machines and real mobile devices. This infrastructure can be remotely controlled through a browser or automation interfaces and can be hosted on-premises if required. Optimize your manual and automated testing workflows for web applications and mobile applications with our intelligent low-code test solutions, designed for efficiency and high-quality performance in enterprise environments. We are committed to fostering long-term, collaborative customer relationships and tailor our services to meet your specific needs.

Experts in & Premier Partner of

triscon IT-Services GmbH
triscon-it.com

triscon is the go-to-company in the very specialized area of performance engineering. Whether microservices in the cloud or legacy on-premise: We will show you the added value of load & performance tests, performance tuning or monitoring solutions.

In the area of application performance monitoring, we like to work with the enterprise solution from industry leader Dynatrace. triscon is Dynatrace Premier Partner and therefore amongst an exclusive group of companies in the EMEA region specialized in Dynatrace.

Dynatrace automatically identifies, verifies, and monitors dynamic multi-cloud environments. In the event of problems, an alarm is issued, whereby the cause of the problem is processed in the form of an automatic root cause analysis. Automated and intelligent on-demand observability for cloud-native workloads and enterprise applications helps you ensure end-to-end monitoring, hybrid cloud monitoring and distributed tracing.

Happy to see you @ the shared triscon & Dynatrace exhibition booth!

UBS - Hainer GmbH
ubs-hainer.com

For over 25 years, UBS-Hainer's main focus has been on setting up and optimizing an automated test data infrastructure. UBS-Hainer provides workflow automation with XDM. XDM goes beyond copying data, it automates all the extra steps required to make test data usable for application tests in an XDM workflow. These workflows can be scheduled to run once or run periodically.

XDM makes the collaboration between different users easy. Information is entered by the single domains and compiled into an overall test data process. Each team gets access to its individual test data process.

XDM's masking tool automatically identifies and masks sensitive data. Predefined modifications and delivered look-up-tables for names and addresses constitute a solid base for building individual data masking scenarios.

Put your test data management on autopilot

XDM by UBS Hainer delivers the appropriate test data giving you more speed, better quality and optimal compliance

FIND

XDM's Test Data Finder searches for application specific attributes and finds test data that meets the users' criteria.

ORDER

XDM's Test Data Shop has customizable online forms that let users order test data at the push of a button.

RECEIVE

XDM dynamically extracts the test data, masks it and provides it to the desired target.

MANAGE

XDM manages the availability and ownership of data for the test environments. It is designed to make your life easier.

Agile test data platform for agile teamwork

EXPERIENCE THE VALUE OF QUALITY

CALL FOR PAPERS

Software Quality Days 2025

WE LOOK
FORWARD TO
YOUR
SUBMISSIONS!

We invite submissions for the upcoming Software Quality Days 2025 in Munich!

We welcome original research, theoretical and empirical papers, and case studies from developers, solution providers, practitioners, and students.

All submissions will be peer-reviewed, and accepted papers will be presented at the conference - scientific papers will additionally be published in the conference book by Springer.

Join us for an exciting opportunity to share your work and engage with a diverse group of like-minded professionals!

Call for Paper opens Summer 2024
